

## Over Voltage and Over Current Protection IC

### General Description

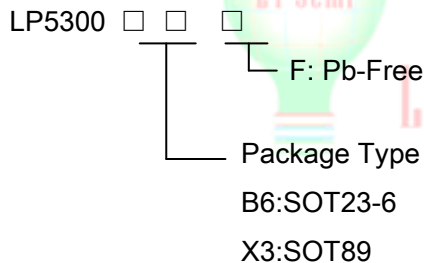

The LP5300 is an Over-Voltage-Protection (OVP) and Over-Current-Protection (OCP) device. The device will switch off internal MOSFET to disconnect VIN to VOUT to protect load when any of input voltage, input current over the threshold. The Over temperature protection (OTP) function monitors chip temperature to protect the device.

The LP5300 is available in SOT-23-6L and SOT89 package. Standard products are Pb-free and Halogen-free.

### Absolute Maximum Ratings <sup>Note 1</sup>

- ◇ Input Voltage to GND ----- 36V
- ◇ Output Voltage to GND ----- 6.5V
- ◇ Maximum Junction Temperature ----- 150°C
- ◇ Maximum Soldering Temperature (at leads, 10 sec) ----- 260°C

**Note 1.** Stresses beyond those listed under “Absolute Maximum Ratings” may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated in the operational sections of the specifications is not implied. Exposure to absolute maximum rating conditions for extended periods may affect device reliability.
