

## Features and Benefits

- TTL, DTL, PMOS, or CMOS compatible inputs
- 500 mA output source current capability
- Transient-protected outputs
- Output breakdown voltage to 50 V
- DIP or SOIC packaging

## Description

Recommended for high-side switching applications that benefit from separate logic and load grounds, these devices encompass load supply voltages to 50 V and output currents to -500 mA. These 8-channel source drivers are useful for interfacing between low-level logic and high-current loads. Typical loads include relays, solenoids, lamps, stepper and/or servo motors, print hammers, and LEDs.

All devices may be used with 5 V logic systems—TTL, Schottky TTL, DTL, and 5 V CMOS. The device packages offered are electrically interchangeable, and will withstand a maximum output off voltage of 50 V, and operate to a minimum of 5 V. All devices in this series integrate input current limiting resistors and output transient suppression diodes, and are activated by an active high input.

The suffix "A" indicates an 18-lead plastic dual in-line package with copper lead frame for optimum power dissipation. Under normal operating conditions, these devices will sustain 120 mA continuously for each of the eight outputs at an ambient temperature of +50°C and a supply of 15 V.

## Absolute Maximum Ratings

Characteristic	Symbol	Notes	Rating	Units
Output Voltage Range	$V_{CE}$		5 to 50	V
Input Voltage	$V_{IN}$	2981	20	V

<sup>1</sup>Negative current is defined as coming out of (sourcing) the specified device terminal.

<sup>2</sup>All unused inputs must be connected to ground. Pull-down resistors (approximately 10 k $\Omega$ ) are recommended for inputs that are allowed to float while power is being applied to  $V_S$ .

<sup>3</sup>All inputs simultaneously.

<sup>4</sup>Turn-off delay is influenced by load conditions. Systems applications well below the specified output loading may require timing considerations for some designs, i.e., multiplexed displays or when used in combination with sink drivers in a totem pole configuration.
